

ALHASSAN JAWAD

ELECTRICAL ENGINEER | OT-SECURITY ENGINEER

CONTACT

- +46 76 281 8440
- alhassan0000@yahoo.com
- Blodboksgränd 15, 16577
Hässelby, Stockholm
- www.alhassanjawad.com
- linkedin.com/in/alhassanjawad
- www.github.com/AcheronEiden

PROGRAMMING SKILLS

- Python & Java
- C & C++
- JavaScript & TypeScript
- HTML & CSS
- Data analysis, System optimization

ELECTRICAL & CONTROL SYSTEMS

- MATLAB & Assembly
- Control Systems
- Embedded Systems
- IoT (Sensors & ESP32)
- Signal Processing

SOFT SKILLS

- Problem Solving
- Strategic Planning
- Team & Time Management
- Self-taught

LANGUAGES

- Swedish (Fluent)
- English (Fluent)
- Arabic (Native)

INTERESTS

Programming | Reading books
Spending time with the family

REFERENCES

Available on request

ABOUT ME

Electrical Engineer specializing in OT-security and control systems. I combine a deep understanding of electrical infrastructure with expertise ranging from low-level programming to advanced software development. With a focus on control theory, IoT, and embedded systems, I am eager to apply my engineering skills toward security-conscious software development. I aim to contribute to building robust and future-proof technical solutions for critical infrastructure.

RELEVANT EXPERIENCE

Software Engineer

Sep 2025 - Dec 2025

Portabel Health (Internship)

- Contribute to the development and implementation of technical solutions across various projects.
- Improve work processes by contributing to project management and technical documentation.
- Apply industry best practices and technical standards to solve real-world challenges.

Programmer & SEO Analyst

Jun 2025 - Sep 2025

Bonn Bonn AB (Freelance/Contract)

- Established the basic structure of the website and integrated payment methods and social media
- Fixed an email marketing system with standard strategies, and optimized and configured SEO for the website

Teaching Assistant

2023 - 2025

Uppsala Universitet

- Assisted over 50 students per semester with concept clarification, concept explanation & feedback
- Graded assignments and examinations
- Collaborated with respective faculty to develop course materials and address student inquiries

Co-founder & Chief Technology Officer (CTO)

March 2023 - June 2024

NordicFlip / FurryTool (Startups)

- Drove a 20% increase in user engagement by leading the end-to-end technical development, from initial architecture to feature implementation.

EDUCATION

Master of Science (M.Sc.) in Electrical Engineering

2025 - 2027

Department of Electrical Engineering | Uppsala University

Specialization: Control of electrical systems & programming of embedded systems

Bachelor of Science (B.Sc.) in Electrical Engineering

2019 - 2022

Department of Electrical Engineering | Uppsala University

SELECTED PROJECTS – ELECTRICAL & CONTROL SYSTEMS

Master's Thesis: Automated Aeroponic Cultivation System (2025)

[Cooperated internally with Uppsala University]

- Developed and implemented a rule-based **control algorithm on an ESP32 microcontroller** to regulate temperature and humidity in a MIMO (Multiple-Input Multiple-Output) system.
- Utilized **IoT sensors** to gather real-time data and automate a sustainable cultivation environment, demonstrating practical application of control theory and embedded systems.

Bachelor's Thesis: Smart Building Energy Management (2022)

[Cooperated internally with Uppsala University]

- Led a project to develop a real-time **control system** to optimize energy usage in a commercial property.
- Analyzed data from **IoT sensors** and implemented predictive algorithms using **Python** and **MATLAB** to manage the building's power flexibility.
- **Result:** Achieved a **35% reduction** in the building's peak electricity consumption.

Project: Signal Processing Framework (2022)

[Cooperated externally with Studenternas IP, Uppsala]

- Developed solutions in **MATLAB** and **Python (NumPy/SciPy)** for analyzing complex electrical signals.
- Implemented digital filter design and anomaly detection to extract meaningful insights from noisy signal data.
