

ALHASSAN JAWAD

ELECTRICAL ENGINEER | FOCUS: CYBER & OT SECURITY

CONTACT

- +46 76 281 8440
- alhassan0000@yahoo.com
- Blodboksgränd 15, 16577
Hässelby, Stockholm
- www.alhassanjawad.com
- linkedin.com/in/alhassanjawad
- www.github.com/AcheronEiden

TECHNICAL COMPETENCIES

- Python & Java
- C & C++
- JavaScript & TypeScript
- HTML & CSS
- Data analysis, System optimization
- MATLAB & Assembly
- Control Systems
- Embedded Systems
- IoT (Sensors & ESP32)
- Signal Processing

LANGUAGES

- Swedish (Fluent)
- English (Fluent)
- Arabic (Native)

SOFT SKILLS

- Problem Solving
- Strategic Planning
- Team & Time Management
- Self-taught
- Analytical thinking

ABOUT ME

Electrical Engineer specializing in **OT-security** and **control systems**. I combine a deep understanding of electrical infrastructure with expertise ranging from **low-level programming** to advanced software development.

With a strong focus on **control theory**, **IoT**, and **embedded systems**, I am eager to integrate my engineering skills with **security-conscious software development**. My goal is to contribute to building robust and future-proof technical solutions for **critical infrastructure**.

RELEVANT EXPERIENCE

Software Engineer Sep 2025 - Dec 2025

Portabel Health (Internship)

- Developed various system-level solutions across multiple production projects
- Streamlined (and optimized) workflows through technical documentation and agile project management
- Applied industry standards to resolve complex technical challenges

Teaching Assistant Aug 2023 - July 2025

Uppsala Universitet

- Managed 50+ students per semester in complex technical concepts
- Provided conceptual clarification, concept explanation & feedback
- Responsible for grading assignments and exams
- Collaborated with faculty to develop new course materials

Co-founder & Chief Technology Officer (CTO) March 2023 - June 2024

NordicFlip / FurryTool (Startups)

- Technical Leadership: Led the entire technical development from architecture to implementation
- Growth: Driven a 20% increase in user engagement through optimized feature development

EDUCATION

Master of Science (M.Sc.) in Electrical Engineering 2025 - 2027

Department of Electrical Engineering | Uppsala University

Specialization: Control of electrical systems & programming of embedded systems

Bachelor of Science (B.Sc.) in Electrical Engineering 2019 - 2022

Department of Electrical Engineering | Uppsala University

(Degree issued in 2026)

SELECTED PROJECTS – ELECTRICAL & CONTROL SYSTEMS

Master's Thesis: Automated Aeroponic Cultivation System (2025)

[Cooperated internally with Uppsala University]

- Developed and implemented a rule-based **control algorithm on an ESP32 microcontroller** to regulate temperature and humidity in a MIMO (Multiple-Input Multiple-Output) system.
- Utilized **IoT sensors** to gather real-time data and automate a sustainable cultivation environment, demonstrating practical application of control theory and embedded systems.

Bachelor's Thesis: Smart Building Energy Management (2022)

[Cooperated internally with Uppsala University]

- Led a project to develop a real-time **control system** to optimize energy usage in a commercial property.
- Analyzed data from **IoT sensors** and implemented predictive algorithms using **Python** and **MATLAB** to manage the building's power flexibility.
- **Result:** Achieved a **35% reduction** in the building's peak electricity consumption.

Project: Signal Processing Framework (2022)

[Cooperated externally with Studenternas IP, Uppsala]

- Developed solutions in **MATLAB** and **Python (NumPy/SciPy)** for analyzing complex electrical signals.
- Implemented digital filter design and anomaly detection to extract meaningful insights from noisy signal data.
