PROFESSIONAL SUMMARY

IT Operations Specialist currently working part-time at Abbott Laboratories while simultaneously completing a M.Sc. in Electrical Engineering (expected Q1 2027) with coursework focusing on **network administration** and **control of electrical systems**. Experienced in fixing daily computer issues, setting up workstations, maintaining local network connectivity, and helping users solve software and hardware problems

.

Skilled at configuring network switches, routers, and peripheral devices, troubleshooting step-by-step, and keeping clear documentation. Fluent in Swedish and English, focused on keeping daily IT operations running smoothly and helping end users quickly.

EDUCATION

Master of Science (M.Sc.) in Electrical Engineering | Uppsala University — Ongoing, Expected 2027

Focus on control systems, practical hardware interfacing, and network stability

Bachelor of Science (B.Sc.) in Electrical Engineering |Uppsala University — 2019 – 2022 / Issued 2026

Department of Electrical Engineering

KEY SKILLS

- **Desktop Operations & Deployment:** Windows 10/11, Ubuntu Linux, Microsoft Intune, Windows Autopilot, SCCM, PXE, imaging, patching, hardware repairs, PC/printer setup, daily desk-side support
- **Identity & Collaboration:** Active Directory (onboarding/offboarding, access rights, basic user management)
- **ITSM & Ticketing**: ServiceNow, Remedy, incident/request management, VIP/SLA support, ticket tracking
- **Networking & Remote Tools**: LAN/WLAN setup, routers and switches support, TCP/IP, IP addressing, DNS/DHCP basics, Dameware, AnyDesk, BeyondTrust (Bomgar), network troubleshooting tools
- **Hardware & Peripherals**: Laptop repairs, desktop assembly, monitors, mobile device setup (iOS/Android)
- **Languages**: Swedish (Fluent), English (Fluent), Arabic (Native).
- **Mobility:** Driver's License (Category B)

RELEVANT EXPERIENCE

IT Infrastructure Specialist - Abbott Laboratories — Sep 2026 - Ongoing

Provide on-site infrastructure maintenance and client support for Abbott's BTS facility in Solna, serving as the Tier-3 escalation point for divisions across Sweden, Denmark, and Finland. Configure and deploy enterprise hardware, troubleshoot system images, and resolve physical hardware faults directly on site. Administer Active Directory user provisioning, manage access controls, and maintain local network connectivity across site departments.

IT Support Specialist | Portabel Health — Sep 2025 – Dec 2025

- Maintained backend data queries and schema adjustments using PostgreSQL.
- Authored system refactoring documentation and established internal Git branch management workflows to ensure code traceability.
- Supported technical testing and verification across development and QA environments.

IT & Hardware Lab Assistant | Uppsala University — Aug 2023 – Jul 2025

- Provided face-to-face technical support for 50+ students and staff members each semester, fixing hardware and software faults on lab workstations.
- Guided users step-by-step through technical procedures, software installations, and lab equipment setups.
- Maintained lab computers, peripherals, network cables, and measurement devices, making sure all stations were tested and ready for daily use.
- Handled basic connectivity problems between desktop PCs, test benches, and local network devices.
- Wrote straightforward technical instructions and lab cheat sheets for students and staff.

IT & Systems Operations (Co-founder / Tech Lead) | NordicFlip / Furrytool

Mar 2023 – Jun 2024

Startups

- Handled complete IT setup, web hosting, domain names, DNS records, and email configuration for small online platforms.
- Acted as the primary point of contact for technical issues, resolving account problems and connection faults for around 100 active users.
- Managed user access, basic security settings, and external service connections to keep the platform online and working without interruptions.

SELECTED PROJECTS

Local Network & Hardware Setup (Master's Thesis)

Internal Collaboration with Uppsala University

- Connected microcontrollers (ESP32) and sensors over local wireless networks; configured data collection, checked signal stability, and documented the setup steps so systems could be rebooted and maintained easily.

Facility Equipment & Monitoring (Bachelor's Thesis):

External Collaboration with Studenternas IP, Uppsala

- Connected and read data from networked energy monitoring sensors at a commercial sports facility (Studenternas IP), isolating 71.2 kW of power usage across building systems.

Hardware Assembly & Communication Setup

Academic Project(s) | Uppsala University

- Built and wired circuit boards using microcontrollers and Quectel mobile communication modules; tested serial connections, antenna cables, and power delivery to ensure stable data transmission.
