SUMMARY

Practical IT support and network specialist with a strong background in electrical engineering and hands-on hardware troubleshooting. Experienced in fixing daily computer issues, setting up workstations, maintaining local network connectivity, and helping users solve software and hardware problems.

Skilled at configuring network switches, routers, and peripheral devices, troubleshooting step-by-step, and keeping clear documentation. Fluent in Swedish and English, focused on keeping daily IT operations running smoothly and helping end users quickly.

KEY SKILLS

- **Desktop Operations & Deployment:** Windows 10/11, Ubuntu Linux, Microsoft Intune, Windows Autopilot, SCCM, PXE, imaging, patching, hardware repairs, PC/printer setup, daily desk-side support
- **Identity & Collaboration:** Active Directory (onboarding/offboarding, access rights, basic user management), Microsoft 365/Office setup.
- **ITSM & Ticketing:** ServiceNow, Remedy, incident/request management, VIP/SLA support, ticket tracking systems.
- **Networking & Remote Tools:** LAN/WLAN setup, routers and switches support, TCP/IP, IP addressing, DNS/DHCP basics, running network cables (RJ45), Dameware, AnyDesk, BeyondTrust (Bomgar), network troubleshooting tools (ping, traceroute).
- **Hardware & Peripherals:** Laptop repairs, desktop assembly, monitors, mobile device setup (iOS/Android), and connecting external hardware/sensors.
- **Languages:** Swedish (Fluent), English (Fluent), Arabic (Native).
- **Mobility:** Driver's License (Category B)

WORK EXPERIENCE

IT Support Specialist | Portabel Health

Sep 2025 – Dec 2025

- Delivered responsive day-to-day IT support, efficiently resolving a high volume of technical tickets and user requests across staging and production environments.
- Troubleshoot hardware, software, and application setup issues directly on user workstations.
- Handled basic database queries and checks in PostgreSQL to track down data errors reported by users.
- Documented troubleshooting steps and created simple how-to guides to help team members avoid recurring issues and downtime.
- Assisted with software installation, environment updates, and setting up daily developer tools.

IT & Hardware Lab Assistant | Uppsala University

Aug 2023 – Jul 2025

- Provided face-to-face technical support for 50+ students and staff members each semester, fixing hardware and software faults on lab workstations.
- Guided users step-by-step through technical procedures, software installations, and lab equipment setups.
- Maintained lab computers, peripherals, network cables, and measurement devices, making sure all stations were tested and ready for daily use.
- Handled basic connectivity problems between desktop PCs, test benches, and local network devices.
- Wrote straightforward technical instructions and lab cheat sheets for students and staff.

Startups (Closed down)

- Handled complete IT setup, web hosting, domain names, DNS records, and email configuration for small online platforms.
- Acted as the primary point of contact for technical issues, resolving account problems and connection faults for around 100 active users.
- Managed user access, basic security settings, and external service connections to keep the platform online and working without interruptions.

SELECTED PROJECTS

Local Network & Hardware Setup (Master’s Thesis)

Internal Collaboration with Uppsala University

- Connected microcontrollers (ESP32) and sensors over local wireless networks; configured data collection, checked signal stability, and documented the setup steps so systems could be rebooted and maintained easily.

Facility Equipment & Monitoring (Bachelor’s Thesis):

External Collaboration with Studenternas IP, Uppsala

- Connected and read data from networked energy monitoring sensors at a commercial sports facility (Studenternas IP), isolating 71.2 kW of power usage across building systems.

Hardware Assembly & Communication Setup

Academic Project(s) | Uppsala University

- Built and wired circuit boards using microcontrollers and Quectel mobile communication modules; tested serial connections, antenna cables, and power delivery to ensure stable data transmission.

EDUCATION

Master of Science (M.Sc.) in Electrical Engineering | Uppsala University

Ongoing, Expected 2027

Focus on control systems, practical hardware interfacing, and network stability

Bachelor of Science (B.Sc.) in Electrical Engineering | Uppsala University

2019 – 2022 / Issued 2026

Department of Electrical Engineering
